

## Who we are?

TIW is an NDT training & service provider organization located in Chennai, India providing complete solution for NDT training & inspection.

We conduct training for PCN Level 1, 2 & 3 in the following methods

- PCN - Phased Array Ultrasonic Testing (PAUT) (only Level 2 & 3)
- PCN - Time of Flight Diffraction (ToFD)
- PCN - Ultrasonic Testing 3.1 & 3.2
- PCN - UT - 3.8 & 3.9 (Nozzles & Node)
- PCN - Magnetic Particle Testing (only Level 1 & 2)
- PCN - Liquid/Dye Penetrant Testing (only Level 1 & 2)
- PCN - Radiographic Film Interpretation (only Level 2)

## How to Book Your Training Course

To book a training course, simply call [+91 9043322221](tel:+919043322221) and we will be happy to discuss your requirements with you. If necessary, we can provide advice on which type of training and certification is appropriate for you or your company. Enquiries may also be made via email to [admin@tiw.co.in](mailto:admin@tiw.co.in) or by visiting us on the web at [www.tiw.co.in](http://www.tiw.co.in)

On confirmation of the booking, we will send to you an application form which must be completed and returned to us in order to confirm the booking process. Training courses will be conducted on a schedule basis at our Chennai Training and Examination Centre.

## Phased Array UT (PAUT) Course Curriculum

# What is Phased Array Ultrasonic Testing?

Phased array ultrasonic (PA) is an advanced method of ultrasonic testing that has applications in medical imaging and industrial nondestructive testing. Common applications are to noninvasively examine the heart or to find flaws in manufactured materials such as welds. Single-element (non-phased array) probes, known technically as monolithic probes, emit a beam in a fixed direction. To test or interrogate a large volume of material, a conventional probe must be physically scanned (moved or turned) to sweep the beam through the area of interest. In contrast, the beam from a phased array probe can be focused and swept electronically without moving the probe. The beam is controllable because a phased array probe is made up of multiple small elements, each of which can be pulsed individually at a computer-calculated timing. The term phased refers to the timing, and the term array refers to the multiple elements. Phased array ultrasonic testing is based on principles of wave physics, which also have applications in fields such as optics and electromagnetic antennae.

## About the course

### PCN Level 2

This course is designed to provide the participants, a better understanding about theory and application of phased array ultrasonic testing, to train them and qualify them as PCN Level 2 in phased array ultrasonic testing.

### PCN Level 3

This guidance course is aimed at the PCN Level 3 requirements for PAUT practitioners. The main objective of the course is to make candidates fully aware of the scope of the examination and level of knowledge required. It will also enable candidates to identify their weak subject areas. Advice will be given on any further tuition required.

# Qualification Requirements as per PCN24/GEN Requirements

## Training Days

Level 1	Level 2	Level 3
NA	10 Days	5 Days
Direct access to Level 3 requires the total days shown in table for Levels 2 and 3.		

## Experience

Level 1	Level 2	Level 3
NA	180 Days	450 Days
Note-1: For PAUT technique Level 1 certification is not available. If the individual is being qualified directly to Level 3, with no period at Level 2, the experience shall consist of the sum of the periods required for Level 2 and Level 3. No reduction in the period of experience shall be allowed. Note-2: Industrial NDT experience in the appropriate sector may be acquired either prior to or following success in the qualification examination for level 2. (see other essential information in the page 6)		

## Pre-Training Requirement

PCN candidate who do not currently hold, or who have never held PCN, or other BS EN ISO 9712 compliant NDT certification that they shall be required to demonstrate knowledge of materials and processes/product technology.

New PCN applicants (those without PCN certification or certified under ISO 9712) shall complete the Product Technology Learning Program prior to attending any training course.

**Link to attend the online product technology learning programme:** [Home | BINDT](#) (Press control and click the link)

# Course Content

## PCN Level 2

- ❖ Intro & history of UTPA
- ❖ Fundamentals / Principals
- ❖ UTPA probes
- ❖ Beam forming & UTPA scanning
- ❖ Digitization principals
- ❖ Data view & display
- ❖ Selection of parameters & calibrations
- ❖ Software options & Data collection
- ❖ Practical exercises-calibrations
- ❖ Butt Weld plate inspection & Interpretation

# Learning Outcomes

## PCN Level 2

Successful candidate will be able to

- ❖ Select the UT PAUT technique for the test method to be used
- ❖ Define the limitations of application of the testing method
- ❖ Translate NDT codes, standards, specifications and procedures into NDT instructions adapted to the actual working conditions
- ❖ Set up and verify equipment settings
- ❖ Perform and supervise tests
- ❖ Interpret and evaluate results according to applicable standards, codes, specifications or procedures;
- ❖ Prepare UT PAUT written instructions
- ❖ Provide guidance for personnel at level 2 and
- ❖ Report the results of UT PAUT test

## PCN Level 3

Successful candidate will be able to

- ❖ Establish, review for editorial and technical correctness and validate NDT instructions and procedures
- ❖ Designate the particular test methods, techniques and procedures to be used;
- ❖ Within the scope and limitations of any certification held, carry out all tasks at all levels

## What to bring?

- ❖ Scientific calculator
- ❖ Coveralls/Lab coat if possible
- ❖ Safety boots are mandatory in practical areas
- ❖ PCN Candidates: PCN wallet card or other form of photographic identification

## Special Note

- ❖ TIW reserves the right to disqualify the participants from certification program when the personnel is found that they he/she shall not meet the PCN requirements.
- ❖ Participants are not allowed to use their own equipment / laptop during the training and examination. TIW provides candidate with required equipment and other accessories needed for practical inspection.
- ❖ Follow professional dress code during the entire training and examination.
- ❖ Once when enrolled for course, TIW customer care people will send joining instructions through mail and enough information shall be communicated through telephonic call.

## Documents to be submitted for Examination

- PCN24/PSL 57A - Examination application
- PCN24/PSL 30 - Log of Experience
- PCN24/PSL 44 - Vision Requirements (which has to be certified by a registered medical practitioner)
- PCN24/CP-27 - Code of ethics
- PCN E-certificate/ wallet card copy (If available)
- PCN level 1 Certificate copy (If applicable)
- One govt approved identity card (example: Passport / Voter ID / Aadhaar Card) & Two Photographs

## Other information about Training & Examination

Training program comprises of daily assessment after completion of each chapter and the participants are required to get above 70% marks. Based on daily assessment exams, candidate is awarded with successful completion of training.

Then the participants are required to undergo examination which consists of specific and practical examination. Candidate has to obtain a minimum of 70% in each examination to get certified as level 2/3.

This certificate is valid for 5 years from the date of certification. The certificate has to be renewed as per PCN requirements.

Experience may be acquired either prior to (for Level 1 and 2 entries only) or following success in the qualification examination. However, the chances of success in a PCN examination may be significantly reduced if candidates have little or no current experience in the application of the NDT method in the sector concerned.

In the event that the PCN examination has been passed by a candidate lacking the experience required for certification, BINDT will issue a letter of attestation to the successful candidate indicating that they have passed the qualification examination and needs only to meet the experience requirement in order to be certificated.

Records of experience obtained post examination shall be presented on PCN form PCN24/PSL30 or PCN24/PSL57C as appropriate within the 2 years from the date of examination passed.
